SigilArk delivers as a sub-tier partner, teaming under a prime contractor. Contract number, period of performance, value, government POC, and CPARS rating available under NDA on active solicitations.

CORE COMPETENCIES

SigilArk deploys AI agent teams inside the IL4 / IL5 / IL6 boundary — not wrapping a public API. Open-weight models on enclave hardware. **Humans decide; agents do the compliance plumbing.**

- **Air-gapped AI delivery.** Open-weight inference inside the enclave. Zero external API egress.
- **Continuous-ATO automation.** Agents read NIST 800-53 per commit. STIG findings auto-triage to patch PRs. eMASS stays current with the code.
- **Audit-trail output.** Every agent action logged with prompt, tool, and output — structured for RMF evidence.
- **DoD program operations leadership.** TS-cleared executive support to a GS-15 Cyber Operations director at NIWC.
