

Classified-Enclave AI. Delivered Under ATO.

WOSB CERTIFIED

AI-FIRST · ATO-ALIGNED

85%+**AHEAD OF SCHEDULE**

DHA · IL4

0**CVES / FULL STIG**

7 OS · Iron Bank · AMIs

4 Wks**PER FULL STACK**

vs. 7-8 month baselines

I3I+**AI AGENTS MODELED**

across SigilArk stack

SigilArk delivers as a sub-tier partner. Contract number, period of performance, value, government POC, and CPARS rating available under NDA on active solicitations.

CORE COMPETENCIES

SigilArk deploys AI agent teams inside the IL4 / IL5 / IL6 boundary — not wrapping a public API. Open-weight models on enclave hardware. **Humans decide; agents do the compliance plumbing.**

-  **Air-gapped AI delivery.** Open-weight inference inside the enclave. Zero external API egress.
-  **Continuous-ATO automation.** Agents read NIST 800-53 per commit. STIG findings auto-triage to patch PRs. eMASS stays current with the code.
-  **Audit-trail output.** Every agent action logged with prompt, tool, and output — structured for RMF evidence.
-  **DoD program operations leadership.** TS-cleared executive support to a GS-15 Cyber Operations director at NIWC.

SIGILARK STACK

 <p>Glyphon glyphon.ai Licensable multi-provider AI agent orchestration; deploys inside the enclave.</p>	 <p>Colophon colophon.build AI-first engineering platform used to build Glyphon and federal engagements.</p>	 <p>Vallark vallark.build Pre-built mobile ATO compliance floor for DoD application delivery.</p>
